
xelom[®]

all terrain electric vehicles

"xelom is a highly technological company that brings a new idea of all-terrain electric mobility, powerful, eco-friendly, and suitable for all seasons, ensuring a revolutionary driving experience and a profound respect for the environment. xelom has a new vision of the world."

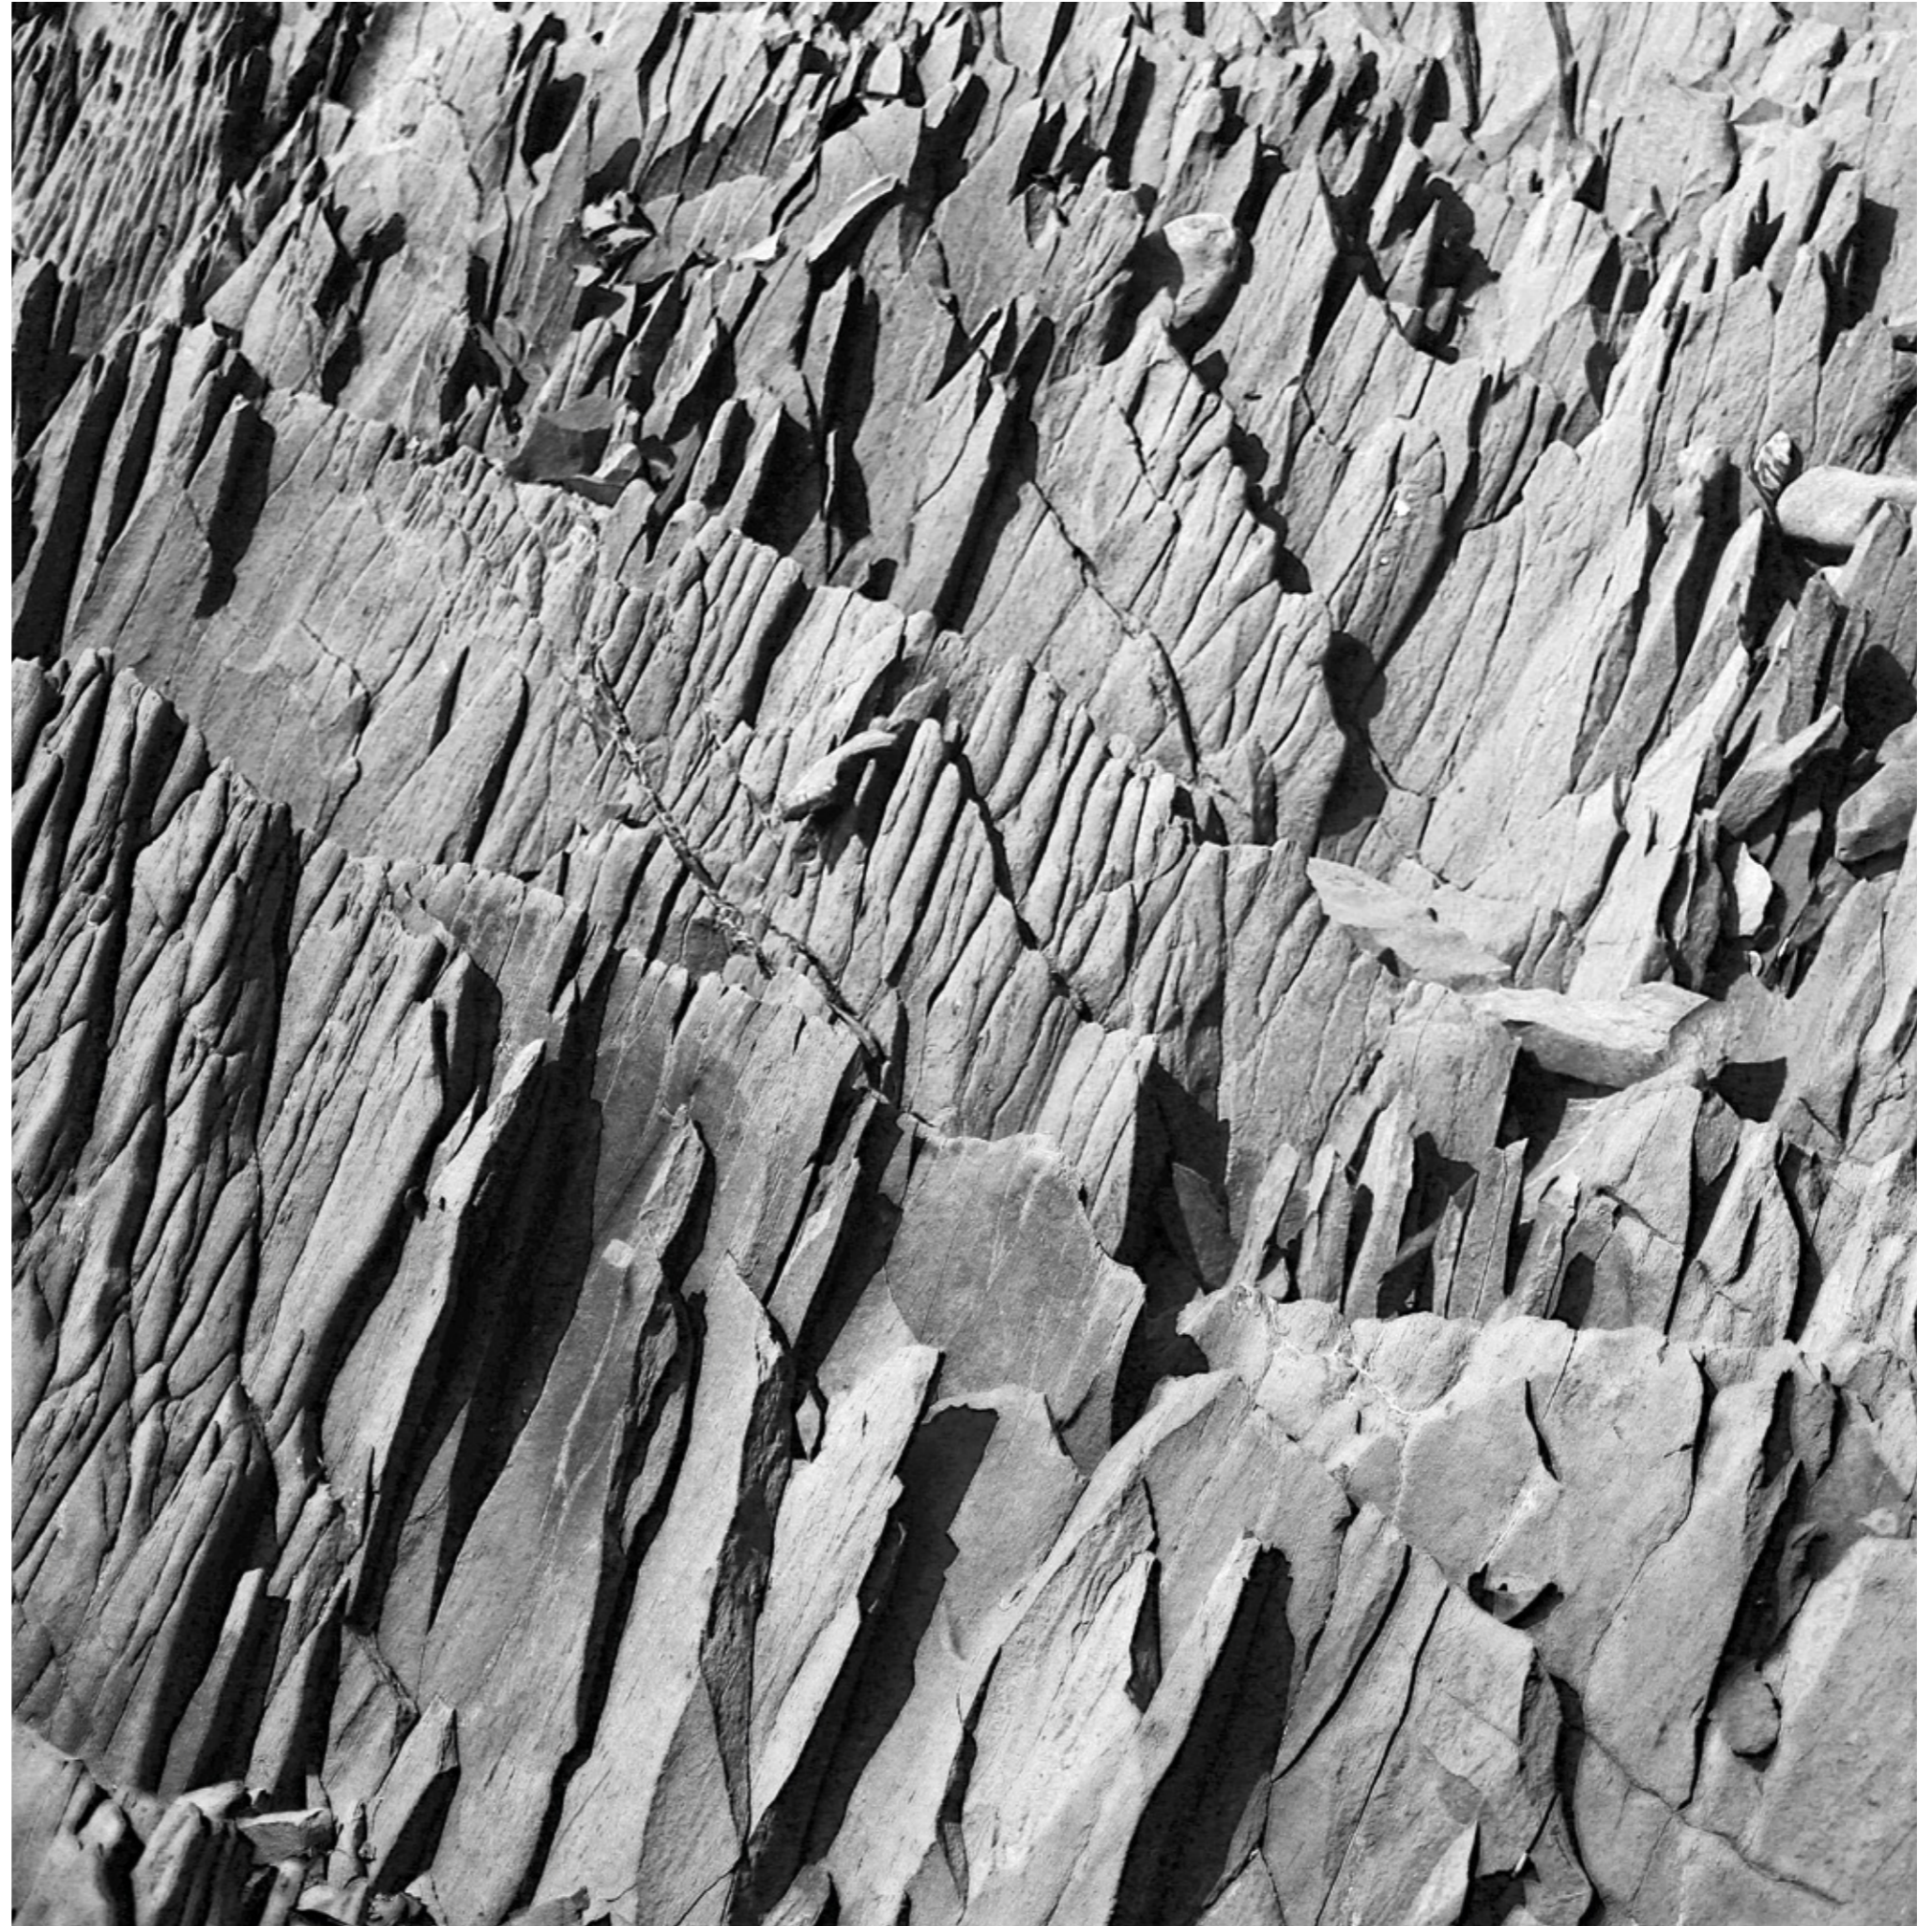

Erich Gummerer CEO

new visions

xelom is an innovative global entity specialized in the production of all-terrain electric vehicles. We design sustainable vehicles capable of delivering maximum performance and a unique user experience. Our next-generation vehicles and machines are born entirely electric, without previous constraints, and are equipped with the best technology to ensure unrivaled autonomy, power, and efficiency. Our mission is to overturn conventions to create a new concept of off-road electric mobility, with human-centered vehicles perfect for every type of terrain and in any climatic condition, even the most extreme. Are you ready to change your way of seeing the world?

all terrain

Explore the range of products designed to dominate three main environments: snow, dust, agriculture. With xelom, no environment is off-limits. Our latest generation electric vehicles are designed to sustainably support those working with dust, such as quarries or mines, agricultural realities, and those navigating snowy environments and extreme conditions. We have laid the groundwork for a new idea of all-terrain operability: sustainable, silent, powerful, and available in every season.

power

With xelom, the power to change is in your hands. We design completely electric vehicles capable of delivering maximum performance, versatility, and a unique user experience. Our vehicles are in harmony with the environment and the user, highly performing on every type of terrain or slope, characterized by extremely low maintenance requirements and operating costs.

new experience

xelom vehicles and machines revolve around the user and their sensations. We have redesigned the idea of comfort to make you feel good while you work, even in extreme conditions. We have dedicated ourselves to designing highly technological yet intuitive vehicles, to offer you better control and greater freedom of action. We have set ourselves the goal of making you work in connection with the environment, thanks to even quieter, more manageable, and welcoming fully electric machines and vehicles. With xelom, the connection with the environment becomes immersive.

new energy

Work using clean energy. xelom products are completely electric and guarantee unparalleled reliability, autonomy, and versatility of use. Thanks to xelom's innovation and continuous research, you can count on exceptional autonomy, machines, and vehicles with great load capacities and stability even on steep slopes. With xelom, you have the energy you want with zero emissions.

humanity

Behind every xelom product is the humanity of those who experiment, design, create, and believe in the power of innovation. Women and men always ready to embrace the challenges of the technological world, zero-emission energy, high-precision mechanics, and design. Thanks to them, xelom creates exciting vehicles and machines, capable of anticipating times and promoting a sustainable future.

SNOW

DUST

AGRICULTURE

environments

We know the planet, its extraordinary diversity. Every landscape, every slope, every context is unique, and that's why our vehicles and machines are designed to move with strength and precision in every environment. No matter where you are, xelom ensures absolute power, zero emissions, and a revolutionary user experience.

We have designed vehicles capable of adapting to every environment, performing and ecological machines where emissions are canceled out, and performance knows no limits. We have chosen to get the most out of the essential by anticipating the future of off-road mobility. We went beyond to create a new concept of sustainability, where people are at the center with their sensations and their driving and usage experience. With a xelom vehicle, you choose to connect with the environment around you, to eliminate all noise to make room for the sounds of nature, to create a relationship with the context to shape it with respect. xelom is sustainability to the highest power.

SNOW CAT

Fully electric

The SNOW CAT makes snow operation a unique and sustainable adventure, effortlessly navigating the snowy terrain with ease. Designed for a completely new driving experience, it is reliable, silent, and equipped with cutting-edge technology. The cabin, designed for user well-being, offers a pleasant and comfortable driving sensation, even during long working sessions, with a modern entertainment system. Robust and suitable for any terrain, it guarantees high performance and reduced operating costs, representing the ideal choice for those seeking efficiency and a new snow driving style.

Zero emission

All terrain

Low maintenance

Remote support

Quick-change system for attachments

Autonomy 5 hours
Supercharger 1000 V
Charging time approx. 2 hours

DUST CRAWLER

Fully electric

The DUST CRAWLER is a fully electric tracked vehicle, designed for effective dust suppression in outdoor areas on difficult terrains such as quarries or marshy and steep terrains. Equipped with a 5,000-liter tank and a powerful EMI CONTROLS V22 Orca turbine with a range of up to 90 m, the DUST CRAWLER ensures extensive coverage in dust suppression. The vehicle also has special nozzles at the rear ends of the tracks to moisten and waterproof the treated terrain. With no additional emissions, the DUST CRAWLER represents a sustainable and efficient solution for large outdoor areas, ensuring minimal environmental impact.

Autonomy 5 hours

Tank 5,000 litres
EMI CONTROLS V22-ORCA turbine
Spray bar and high-pressure pump

ALPIN 10

Fully electric mower

ALPIN 10 is a fully electric mower, developed for agricultural and municipal use, suitable for challenging terrains and steep slopes. Thanks to the efficiency of its powertrain and the ease of battery replacement, ALPIN 10 is the sustainable choice that ensures maximum autonomy and versatility of use. The adjustable handlebar, sturdy towing eyes for transport, color display with integrated remote maintenance, joysticks, and ergonomic buttons maximize the user experience, ease of use, and comfort.

Zero emission
